Total Operating Impact:	0	0
One-Time Startup Costs:	0	
Additional Estimated Annual O&M:	0	0

Prior Funding History / Additional Information:

The purpose of this program is to renovate 30 senior units and extend the useful life for another 30 years.

The projected outcomes are:

- Replace interior lighting;
- Replace boilers;
- ADA compliance;
- Life/safety upgrades;
- Increase energy efficiency.

Sunset View is a 4-story, wood-framed senior housing facility constructed in 1980. The facility includes 19 one-bedroom units, 3 accessible one-bedroom units, a community room, and office and maintenance areas.

No major renovation work has taken place since this facility was built. In FY02, improvements were made to the boiler and laundry rooms.

A professional site assessment was completed in 1996 to address physical condition, 30-year life expectancy, code compliance, the Americans with Disabilities Act (ADA) requirements, energy efficiency and life-safety issues. This site assessment recommended a specific list of improvements, which would extend the useful life of the building and increase the comfort of the senior residents.

This request funds renovation work recommended by the site assessment. The purpose of this project is to replace obsolete building components, increase energy efficiency, enhance ADA compliance, upgrade fire protection and address deferred maintenance items. This request funds upgrades to the building structure, replacement of lighting fixtures throughout the building, installation of new boilers and heating controls, removal of asbestos flooring and installation of new floor coverings, replacement of windows, upgraded fire protection, and brings all components of the building into code and HUD compliance.

The expected outcome of this project is to extend the life of Sunset View another 30 years, enhance security and fire protection, reinforce the building structure, and provide energy-efficient and more comfortable units for the senior residents.
